INTRODUCTION

Frametech Construction has undertaken many challenging projects and accumulated skills, know-how and experiences in construction and engineering works. Frame tech Construction takes role to build up all type of civil construction technical works small, medium, large and mega Projects (residential, commercial, road, Bridge, & all type of construction works).

Our objective is to provide our clients with an “I am assured” Experience when we are chosen to execute their projects. Our emphasis on clear communication and follow through procedures ensures that clients objectives are top priority in the planning and execution of all our process.

Our project management and execution philosophies are: -

- Create details schedule and resources plan to meet clients project objective
- Communicate clearly with all project stakeholders
- Track project progress and fine tune deviations
- Supervise closely on quality of work done
- Complete and commission the project on time

We take pride in our delivery; thus, our clients can always be assured that only the most experienced and qualified people are serving them, all the time.

Frame tech Construction biggest asset is its dedicated, highly skilled team who adopt a truly collaborative approach to their work. They understand the complexities required for the seamless integration of the many different construction methodologies required during construction. Ensuring the on time and in budget delivery of their client’s projects.

Through its integrated business structure, Frame tech construction leverage synergies to use economics of scale, create value and provide a competitive advantage. Its prides itself on being a contractor of choice, its reputation for quality and its long-standing relationship with client’s partners and shareholder.
